```java
import java.util.Scanner;
class Numbers
{
public static void main (String args [])
{
Scanner sc =new Scanner (System.in) ;
System.out.println("enter number one") ;
int n=sc.nextInt();
System.out.println("enter number two") ;
int n1=sc.nextInt();
System.out.println("enter number three") ;
int n2=sc.nextInt();
System.out.println("enter number four") ;
int n3=sc.nextInt();
if(n==n1 && n==n2 && n==n3)
{
System.out.println("equal") ;
}
else
{
System.out.println("not equal") ;
```

```
    }
    }
    }
```
